

To Play:

- Roll both dice and determine which number is larger than the other.
- Count out the larger number of counters and place them in the first circle.
- Put the smaller number of counters in the second circle.
- Subtract circle two from circle one and place the answer and correct number of counters in the third circle.

To play this game you need:

- Two numeral or dot dice
- Counters (beans, m&ms, paperclips etc)
