

Math Concentration Game

Game Play:

1. Mix up the cards. Place the cards number side down in even rows as shown on the right.
2. The object of the game is to get as many matched pairs as you can. A match means pairing a math problem card with its correct answer card.
3. To begin, player one turns over any two cards. Take the cards if the pair matches. Turn the cards back over if they do not match.
4. If the cards were a match, player one gets to take another turn. If the cards were not a match then player two begins their turn.
5. Play continues until all the cards are matched.
6. The player who has collected the most matched pairs wins!

Printing Instructions:

Cards need to be printed double-sided. If you are using a printer that can print double-sided, set your print range to pages 2-9, flipping on the long edge.

Optional: If possible, print on cardstock paper and laminate the cards for durability.
