

# alphabet hearts

## SKILL-

Recognize alphabet letters. Learn upper and lowercase pairs.

## PREP-

Print the heart cards on cardstock to give them extra durability. Cut along the lines to separate the pieces.

If you'll be using the activity in a classroom, you may also want to laminate the cards for extra durability.

Print one alphabet record sheet for each child – either the uppercase version if you'd like to work on letter recognition or the lowercase version if you'd like to work on matching.

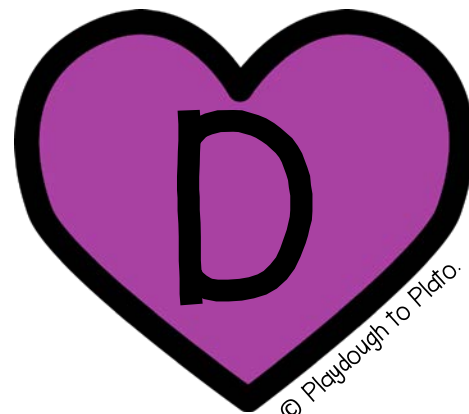

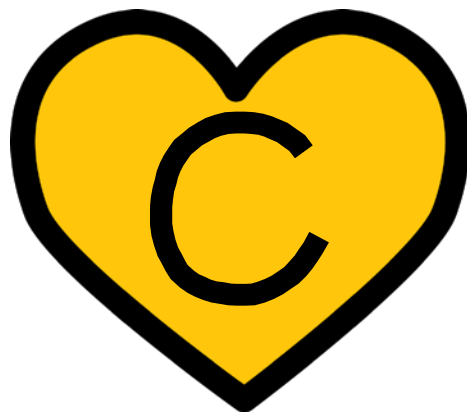

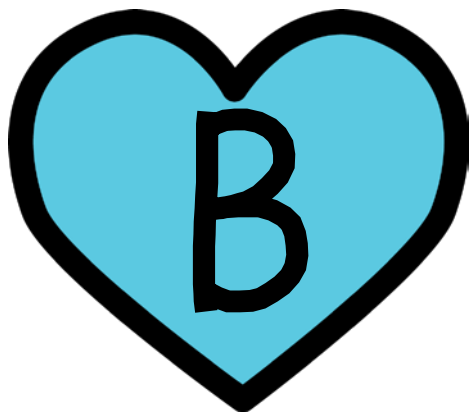

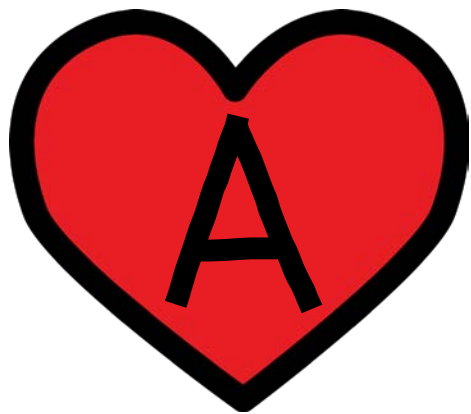

Grab crayons for students to color their answers.

## PLAY-

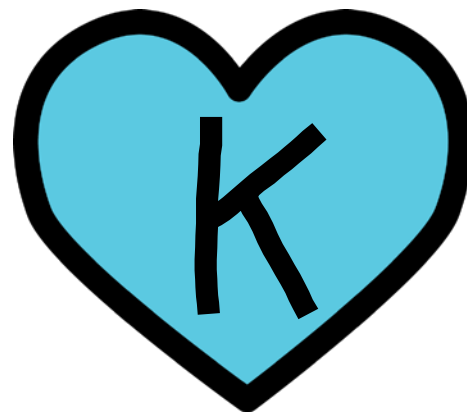

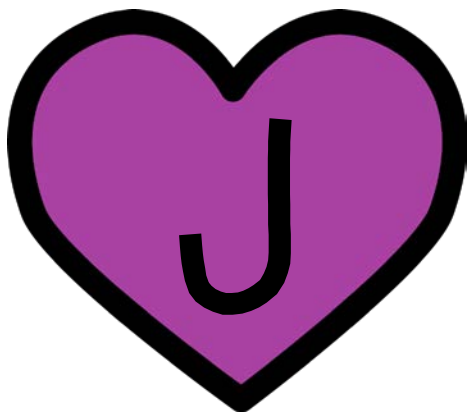

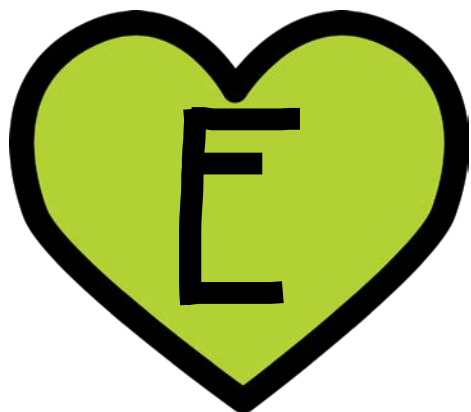

Students pick up one card at a time, read the name of the letter out loud and color the letter on their alphabet sheet to match.

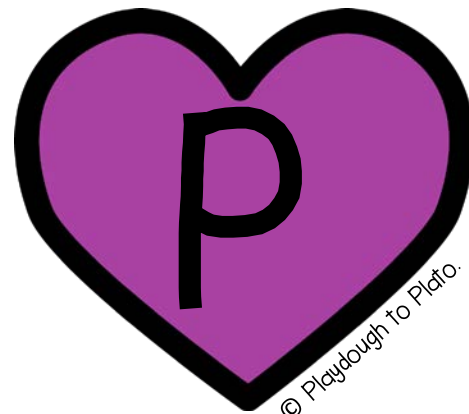

For instance, if a child picked up the yellow C card, he would say "C" and then color the C on his record sheet yellow to match the heart.

Play continues until all letters have been marked.
